

HOW IT WORKS

Cargo, meet Clamp!

Quick-start guide

MEET THE PARTS

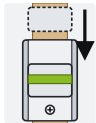

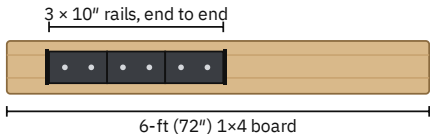

-  **Body and cradle:** holds the item.
-  **Latch:** swings on the hinge.
-  **Lip:** the latch hooks over it.
-  **Lock lever:** double latch only.
-  **Catch:** the lock lever hooks onto it.

Colors mark the parts. Clamps come in black or white.

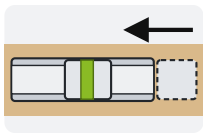

MOUNT THE RAIL

10" rail: horizontal only. Screw it to a stud, or to a 1×4 board at minimum. The board lets you line up more rails to extend the spine.

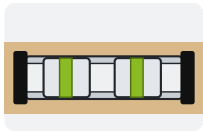

4" rail: vertical only. Screw it upright into a wall stud, then slide a clamp in from the top.

ADD THE CLAMPS

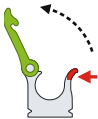

1. Slide each clamp into the open end of the rail. Its base rides in the channel, so place it anywhere.

2. Fit the end caps on both ends so the clamps can't slide out.

SINGLE LATCH

Grab-and-go

1. Open. Push back on the red lip while you lift the latch up and off it.

2. Load. Set the item you're securing into the round cradle.

3. Secure. Press down on the latch while pushing back on the lip until the item is held securely.

DOUBLE LATCH

Required for items in transit, like inside a van or truck bed.

1. Unlock. Flip the lock lever out and off the yellow catch.

2. Open. Push back on the red lip while you lift the latch up and back.

DOUBLE LATCH

continued

3. Load and secure. Set the item into the round cradle. Press down on the latch while pushing back on the lip until it's secure.

4. Lock. Swing the lock lever down until its hook grabs the yellow catch.

To release: flip the lever out first, then push back on the lip and lift the latch.

PICK THE RIGHT SIZE

1"

Broom
handles

1.33"

Shovel
handles

2"

Sledgehammer
handles

Measure first: measure across the handle where the clamp will hold it and pick the closest size. It should sit snug, and the latch should close without forcing.

GREAT FOR

- ✓ **Garage and shed:** brooms, rakes and shovels off the floor.
- ✓ **Pantry and closet:** broom, mop and duster on the wall.
- ✓ **Vans and trailers:** sprayer wands, poles and extension handles on the side wall.
- ✓ **Shop stock:** PVC pipe, conduit, dowels and rods by size.
- ✓ **Hobby gear:** R/C car ramps and other round-handled gear.

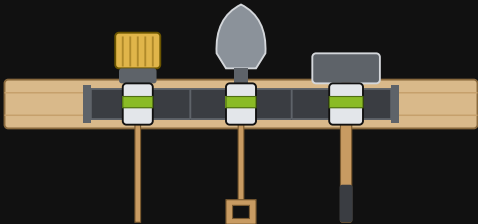

DO NOT USE IT FOR

- ✗ **People or pets.** No climbing, lifting or fall protection.
- ✗ **Vehicle exteriors.** In a vehicle, use it only in the truck bed or cargo area. Never on roof racks or bumpers.
- ✗ **Heavy loads.** Do not exceed 50 lb per clamp.
- ✗ **Items that don't fit.** Forcing the latch can crack it. Too small can slip out.
- ✗ **Heat.** Keep away from engines, exhaust, heaters and other high-heat sources.

CARE AND SAFETY

- ✗ **No drywall alone.** Screw the rail into a stud or a 1×4 board at minimum.
- ✗ **Not a toy.** Small parts: keep away from young children.
- ✓ **Check it.** Look over latches and screws now and then, more often in a vehicle.
- ✓ **Replace it.** Cracked, or the latch won't close securely? Stop using it.
- ✓ **Clean it.** Wipe with mild soap and water.
